**Date:** 26<sup>th</sup> January 2011

**Re:** Conserve Water Notice – Don & Forth - UPDATE

---

Cradle Mountain Water wishes to advise that the conserve water notice that was issued earlier today for Forth & Don residents remains in place tonight and is not expected to be lifted until lunchtime Thursday 27<sup>th</sup> January.

Cradle Mountain Water issued the conserve water notice as a result of a power failure at the Forth Treatment Plant on Tuesday night. Aurora remains on site addressing the issue but it is taking longer than originally anticipated.

Residents in affected areas are asked to conserve their water use throughout the night and tomorrow. While there is water in Cradle Mountain Water's storage facilities, preventative measures such as conserving water during this time ensure a continued supply of water to residents once power is restored.
