Re: Conserve Water Notice – Don & Forth

Cradle Mountain Water has issued a conserve water notice to residents in the Don and Forth areas due to a power failure at the Forth Treatment Plant overnight.

Cradle Mountain Water does have an alternative power supply and Aurora crews are currently on site addressing the issue, however power is not expected to be restored until the end of the day. So residents in affected areas are asked to conserve their water use today.

Preventative measures such as conserving water during this time ensure a continued supply of water to residents once power is restored.
